Computer Science AS Degree Tips Sheet

The Computer Science AS degree (CMPS) is designed to provide the first two years of a rigorous four year program in Computer Science. Students who are interested in a two year career training program should consider the Information Technology AAS or Information Technology-Computer Networking AAS degrees instead.

- Prerequisites for all required Math courses and Computer Science courses are enforced.
- A student that enters the program without the necessary math prerequisite (MAT 108 or appropriate placement test score) needs to take the necessary math prerequisite before they consider taking CIS 143 (the 1st course in a four course (semester) sequence). These students should be encouraged to take CIS 122 (can be used in the degree sheet as a free elective) while they are catching up on their math prerequisites.
- The CMPS degree requires math up through Calculus I (MAT 131) but most transfer schools require up through at least Calculus II and some require up through Calculus III. CMPS majors should check as soon as possible with their transfer school about their Calculus requirement. RPI transfers need to take up through Calculus III which will transfer into RPI as two calculus courses and meet their calculus requirement. **It is highly recommended that students complete their Calculus requirement at SUNY Adirondack rather than doing some of it here and the remainder at their transfer institution.**
- Many computer science programs at transfer schools require two semesters of physics. Students should check with their transfer schools. RPI transfers should take EGR 105 and EGR 106 to satisfy RPI's physics requirement.
- CIS 243 is the most rigorous course in the CMPS major. Since the assignments in that course require **LARGE** amounts of time, when registering for CIS 243, students should plan their schedules with that in mind.
- The prerequisite for CIS 244 is CIS 243 or permission of instructor. Since this course is a spring only course, some students may find themselves taking CIS 243 (the 3rd course in a sequence of 4) in the spring and then needing to wait until the following spring to take CIS 244 (the 4th course in the sequence). To take both courses in the same spring semester, students must get permission from the CIS 244 instructor, which is typically granted as long as the student has received at least a B in CIS 144. A student that falls into that category should also have taken CIS 150 before the semester that he/she is forced to take CIS 243 and CIS 244 together.
